

AI Career Assistant Agent

Resume Analysis • Skill Extraction • Job Role Prediction

Presented by: **Madhumitha M** | DMI College of Engineering

The Problem

Unclear Resume Strength

Students and freshers struggle to understand how strong their resume actually is.

No Skill-to-Job Mapping

No simple tool to match existing skills with relevant job roles.

Slow & Inconsistent Analysis

Manual resume review is time-consuming and lacks guidance for career direction.

Proposed Solution

AI-Based Resume Assistant Tool

A fast, beginner-friendly career guidance system that automatically:

- Cleans resume text
- Extracts technical skills
- Calculates a skill score
- Predicts the most suitable job role

Key Features

Text Cleaning

Resume text cleaning and word extraction

Skill Detection

Detects Python, Java, JS, AI, SQL and more

Scoring System

Basic scoring based on matched skills

Job Role Prediction

Rule-based AI logic with terminal output

Tech Stack

```
ynnot- Python {{
  rwnxtu=
  iniclrocnardo((C))      {
    sef`bohn'){
      Pyttho stnor:" {}
      Pytkoveyter"Wl".-(flak,"Xy6))}
      (≡nsLst#e≡")
      pvseicscnethr(="thr'))
      "mygfeivulylk(=,wthil))}- }
      áolpaahond(, (yrc"),
      (eceletyfW'))
      fyobatyemsey="(y("ful") }
      ivercglvethy-fye-)}
      Pyhalinl("f) }
}
```

Python

Core programming language

String Processing

NLP basics for text handling

Rule-Based AI

Modular logic in VS Code environment

System Architecture

1

`add.py`

Resume cleaning & text processing

2

`analyzer.py`

Skill database + detection logic

3

`predictor.py`

Job role prediction logic

4

`main.py`

Final execution & output

Workflow

A streamlined pipeline from raw resume text to actionable career prediction — fully automated and rule-driven.

Sample Output

6

Basic Score

Overall resume score calculated

3

Skills Found

Python, JavaScript, AI detected

Predicted Job Role: Junior Developer (Python)

Future Improvements

PDF Upload Support

ML Model Integration

API Job Recommendations

UI / Frontend

Real-Time Career Suggestions

Conclusion

✓ Working Prototype

Successfully built a functional
AI Career Assistant

🎯 Skill-to-Job Mapping

Helps students understand
career direction clearly

🚀 Scalable Design

Lightweight and upgradeable to a full AI recruitment system

Thank You!
